

Archer Animal Hospital
GENERAL SURGERY ANESTHESIA RELEASE FORM

OWNER'S NAME: _____ PET'S NAME: _____

PROCEDURE(S) ANESTHESIA FOR: _____

I hereby authorize and direct the veterinarians of Archer Animal Hospital to perform the above listed procedure(s) and/or treatment(s) as deemed advisable or necessary for my pet. The nature of the procedure(s) have been explained to me. No guarantee has been made as to the results or cure. I am aware and understand that there are risks involved in these procedure(s) and/or treatment(s). Potential risks are: infection, tissues not healing, pain, drug reactions, digestive problems, and death.

I agree to pay in full for the services rendered, including those deemed necessary for medical or surgical complications and/or unforeseen circumstances. Any estimate of fees for presently planned procedures is only an approximation, and the final bill may be more or less than this amount.

We are a flea and tick free facility! Upon admission, if it is discovered that your pet has fleas or ticks, they will be treated upon entry at the owner's expense.

ALL SERVICES RENDERED MUST BE PAID IN FULL BEFORE THE PATIENT CAN BE RELEASED FROM THE HOSPITAL.

SERVICES:

Research has shown that pain management is very important in your pet's recovery from surgery. We highly recommend therapeutic pain management for all surgery patients. We will administer pain medication to your pet, before and after surgery. The cost for this procedure is \$31.73, unless quoted otherwise.

I accept pain medication for my pet: _____

Signature

Many of the drugs used in anesthesia are removed from the body by the liver and kidneys. It is important to know how these organs are working before administering any drugs. Since organ function is negatively affected by age, older pets will require more extensive testing.

| | |
|--|-----------------------------------|
| 8 weeks to 2 years – PCV, Total Protein, BUN | \$30.00 \ |
| 3 years to 5 years – CBC (Complete Blood Count), Mini Panel | \$79.50 > unless quoted otherwise |
| 6 years or older – CBC (Complete Blood Count), Chemistry Panel | \$99.50 / |

I accept blood work for my pet: _____

Intravenous fluids provide support to the heart, lungs, and kidneys during anesthesia. An intravenous catheter is inserted into your pet's vein to provide access for the fluids to be given and to administer life saving drugs in the case of an emergency. The cost for this procedure is \$53.98, unless quoted otherwise.

I accept an IV catheter and fluids for my pet: _____

Signature
